JEALOUSY CAUSES WOMAN'S SUICIDE

Mrs. Mattie Scott Takes
Poison After Break
With Sweetheart

LOVER WATCHES ACT

Herbert Roy Stands Aghast
As She Drains Fatal Fluid
Before His Eyes

WANTED HIM TO DIE ALSO

Letters Written by Dead
Woman Reveal Scheme to
End Two Lives

BULLETIN.
Charles Scott, husband of Mattie Scott, who killed herself after a quarrel with Herbert Roy of Tulsa last night, arrived here at an early hour this morning, accompanied by his little daughter, Fern, to whom one of the letters left by the dead woman was addressed.
Scott declined to make any statement regarding the tragedy.

Maddened with jealousy because Herbert R. Roy 1321 East Admiral highway would have nothing more to do with her, Mrs. Mattie Scott, 25 years old, committed suicide by taking arsenic antipile tablets at her home 1228 East Admiral boulevard about 10 o'clock last night.

Roy who was in her room at the time she took the poison said that the woman suddenly became angry and stepped between some curtains in the room, she drew out a glass of what looked like grape juice.

Says Last Goodbye.
"Good bye, Shug," Roy stated she said, "there's nothing left here for me, I'm just in the way, and I'm going to die."

He said he ran to the glass and saw her drink from it. He said he saw her drink from it. He said he saw her drink from it.

In a letter which was found later the evening under her pillow, she said that she meant to kill Roy for her. "I am the cause of everything," she said.

Meant to Kill Roy.
In another sheet of the same letter addressed to her 13-year-old daughter, Fern, the dead woman said that she meant to kill Roy for her. "I am the cause of everything," she said.

The young daughter was in Mattie's room at the time of the suicide. She was sitting on the bed, and she was looking at her mother.

The father and mother had been separated for more than a year. Mrs. Scott had been living with Roy for some time.

Puts Blame for House Shortage On Modern Bride

CHICAGO, Aug. 1.—Modern brides were blamed for the present shortage of homes by F. E. Davidson, president of the Illinois Society of Architects, in a speech today before that organization.

Mr. Davidson called the modern bride "a kitchenette board who sends down the corner delicatessen store for her evening meal, and who would rather ride in an automobile than own a home."

At the same time figures were given out showing that 352 permits for residences for 1921 had been issued in the city last month—a new record—and that a total of 1,592 permits have been issued since the first of the year.

These figures led to a prediction that there would be a surplus of apartments in Chicago by October 1.

APPLEBY SECURES NEW DRY LAW JOB

Second Appointment for
Committee in the
Past Two Months

MADE GENERAL AGENT

Will Be Member of "Flying
Squadron" but Will Be
Assigned No District

GIVES OFFICIAL REPORT

Covering Work During Brief
Tenure of Office as Head
of Southwestern District

By R. N. Timmons.
World Staff Correspondent.

WASHINGTON, Aug. 1.—John D. Appleby, secretary of the republican state committee of Oklahoma, has been given his second government job in two months, and it is believed this one will stick for a while, at least.

Position Abolished.
On June 12 Appleby was appointed supervising federal prohibition agent in charge of the southwestern department, but the ink was hardly dry on his commission when the prohibition service was reorganized and the position to which Mr. Appleby had been assigned was abolished.

Efforts were made at once by the Hatfield-Harris element to have Mr. Appleby taken care of by the prohibition commissioner and position as a member of the "flying squadron" was picked out for him by his backers, but Commissioner Hayes was not inclined to give him this position, and for several weeks it has been entirely uncertain whether Mr. Appleby would be cared for or not.

Made General Agent.
Announcement was made officially today, however, that he has been selected for general prohibition agent, which means that he will be a member of the flying squadron with no particular territory but subject to orders in any part of the country.

In announcing the change in Mr. Appleby's position, the prohibition commissioner today quoted Mr. Appleby's report of his operations since he took his short-lived office on the 13th of June.

The southwestern department, of which he had charge, consisted of Arkansas, Missouri, Oklahoma, Kansas, Louisiana and the northwestern part of Texas.

Report Shows Action.
Mr. Appleby's report shows that during his tenure of office 316 arrests have been made in Oklahoma, Arkansas and the Kansas City territory; 70 stills were captured and 650 gallons of beer, 250 gallons of whisky and 2,550 gallons of cider were seized.

Six New Orleans breweries alleged to have been making beer in violation of the law were seized. A similar charge has been filed against St. Louis breweries; approximately \$150,000 in fines and penalties were collected at a single term of federal court in Kansas City, and approximately \$100,000 were collected at similar terms in Texas and Oklahoma.

The president's address, delivered within a few hundred feet of the spot where Plymouth rock has been enfolded in iron palings to preserve it for posterity, was part of an anniversary celebration in which President Coolidge and many other high officials of state and nation participated.

Heads Parade.
Earlier in the day had headed a parade of civic, military and naval organizations through the historic streets of Plymouth, and tonight he reproduced the landing of the Pilgrims.

With Mrs. Harding and a party of friends, the president reached Plymouth from Washington shortly before noon. He was met by a band of music and a line of dignitaries named for the Pilgrims and which included this harbor under such different circumstances six years ago.

Three battleships and six destroyers formed a line in the harbor, and the president was welcomed by the becoming of the presidential salute from a battery ashore, while a fleet of cruisers, the Cambrian, dipped the ensign to the presidential flag just outside Plymouth harbor.

As a troop of cavalry formed a presidential guard of honor, and many organizations, including a unit of British soldiers from the Canadian expedition, were present.

The exercises of the day were presided over by the president, who was accompanied by Mrs. Harding and a party of friends.

At the same time figures were given out showing that 352 permits for residences for 1921 had been issued in the city last month—a new record—and that a total of 1,592 permits have been issued since the first of the year.

These figures led to a prediction that there would be a surplus of apartments in Chicago by October 1.

Scientist Will Blaze Path Across Pole by Airship in Hunt for Commercial Route

WASHINGTON, Aug. 1.—Plans for a trans-Arctic flight in September from Point Barrow, Alaska, to Spitzbergen and the North Cape, Norway, were announced here today by Edwin Parfitt, Navy.

New York, maritime observation of ocean air and currents will be the chief purpose of the trip, he said, with the hope of establishing the feasibility of the new route for commerce as a secondary consideration.

Start From Seattle.
The start will be made from Seattle with a convoy of several planes which will proceed on the Alaskan coast to Point Barrow, stopping at Ketchikan, Anchorage and Nome.

The Arctic flight will be made by one plane carrying four men, Mr. Parfitt, and three former service men.

"We plan to make the flight as early as possible," Mr. Parfitt said. "The flight across the Arctic will be about 100 miles an hour, to which might be added the speed of a following wind current."

Fuel Is Problem.
Fuel would be the chief problem. A supply ample for 50 hours of continuous flight will be carried. It was said, and those plans were the attempt to establish the belief that this would furnish an excuse which would permit short by flights at the first landing place on the pole and at the pole itself.

The man spent much time in the Arctic, and he found it is the intention to make the trip a mile without a stop.

If the first flight is successful, others will be undertaken to cover the Arctic, and he said, "We believe that this would furnish an excuse which would permit short by flights at the first landing place on the pole and at the pole itself."

PELLAGRA PLAGUE SPREADS RAPIDLY

Over 600 Cases in State
Is Estimate of Health
Commissioner Lewis

WON'T MINIMIZE EVIL

Danger Very Real in Okla-
homa; Indians Fall Victim
to Disease Is Report

TULSA COUNTY UNAFFECTED

No Chance for Epidemic
Here, Say Physicians;
Nourishment Is Good

OKLAHOMA CITY, Aug. 1.—More than 400 cases of pellagra in Oklahoma today were reported to Dr. A. H. Lewis, state health commissioner. Tonight he said he would not minimize the danger in Oklahoma from the disease and said he was sure there were from 500 to 600 cases in the state. He planned to attend a Washington conference on pellagra conditions in the south, but said a typhoid epidemic in Hughes county probably would cause J. P. Polan, assistant state health commissioner, to be sent.

Indians Attacked.
The disease is becoming prevalent among the Indians, according to health commissioners, especially among the women, who stay at home much of the time and live principally on cornbread and salt pork. The man spend much time in the fields where they eat various foods and thus escape pellagra, according to the commissioner.

Many of the afflicted persons have been treated by physicians. Dr. Lewis said, because pellagra appears much as a typhoid fever and is in the secondary stage before the cases are diagnosed.

Issue Warning.
It is of prime importance that the appearance of sunburned spots should be protected immediately from the sun, the commissioner said, as only by this manner can they be kept from becoming sores that lead to the secondary stage. It also is of the greatest importance that the diet be changed to one of nutritious foods and that the patient be well nourished.

The three stages of the disease were described tonight as follows:
Primary—Appetite lost; loss of weight and force and exposed parts of body, followed by sores that become worse gradually. Interior of mouth, gums and tongue become inflamed.

Secondary—Stomach disturbed; food repulsive.

Final—Mental trouble; melancholy, insanity or death.

That Tulsa is in no danger of an epidemic of pellagra at this time is the reassuring word of the city's leading physicians.

Due to the good financial condition of Tulsa and Tulsa county, the disease will have little cause for propagation here, the physicians declared. The country's leading physicians, it is caused by under-nourishment and a lack of variety in diet.

Since pellagra is most liable to spread in those sections where money matters are the tightest and the poorer classes are therefore forced to eat only a few staple foods, Tulsa is especially fortunate at this time.

No cases of the disease have been reported in Tulsa, according to Dr. L. C. Preston, city physician.

Another Judge Talks.
BIRMINGHAM, Ala., Aug. 1.—Whipping of a man and woman here on July 23 by a masked mob was "one of the most outrageous crimes ever committed in the history of Jefferson county," Judge H. P. Holm said today in ordering a grand jury to investigate every unlawful transaction in this (Harris) county.

"Such activities would tend to intimidate officers in the carrying out of their duties and destroy the orderly procedure of the courts."

"Our government is founded on law and order," he said.

Wanted Law Observed.
Declaring that "any organization, no matter how goodly its members think themselves to be, which attempts to try a man without giving him the right to be heard by its officers and present his own witnesses in conducting a trial, is unwarranted and lawless."

The grand jury was ordered to investigate every unlawful transaction in this (Harris) county.

"Such activities would tend to intimidate officers in the carrying out of their duties and destroy the orderly procedure of the courts."

"Our government is founded on law and order," he said.

Greeks Race For American Shores To Beat New Law

NEW YORK, Aug. 1.—It was immigrants to form their line on the three-mile limit.

Since Friday there had been off Sandy Hook on the steamship Megali Hellas a crowd of Greeks, who could not crowd into the United States with the July quota allotted their country under the new restrictive immigration laws.

Then just as the calendar was slipped over to August, along came the steamer Calabria, with another contingent of Greeks whose number, added to those aboard the Megali Hellas, gave a total of 704, or 45 more than Congress had allowed.
